Focused, energetic Software Engineer who loves learning about new technologies and how they can help empower businesses, communities and people. While working full time the last 3 years I have been pursuing a Post Baccalaureate degree in Computer Science.

TECHNICAL SKILLS

Programming Languages
C++, Python, C

Web Frameworks
Express, Django

Databases
MySQL

Tools
GitHub, Linux, Xcode

PERSONAL PROJECTS

Fantasy Football Database (MySQL, HTML, Node.js, JavaScript)
- Created a build your own fantasy team database. Users can add, remove and edit their players.
- Worked with a team member to ensure site was functional where each team had the correct players.

Money finder game (C++)
- Built a text based game using C++ where the user's goal is to get to money.
- User starts in a room then walks through different rooms and is given a prompt after each step of where he/she is. Either you fall in a trench or get money!

GoodFit – Elderly Housing Simplified (JavaScript, MySQL, Node.js, HTML)
- Group Project in which we created a web portal for people to search for elderly housing.
- As a group we had a "customer" who we met with regularly to reach his ideal product. We implemented a landing page, description page and also a sign up page.

Personal Website (HTML, CSS and Bootstrap 4)
- Developed a personal website to share projects and things that I enjoy doing on my free time.
- Implemented front-end design with Bootstrap 4.
